Job Details

The supply chain analytics group is responsible for delivering the solutions and developing the capabilities that enable better decision-making in supply chain. This team works closely with all supply chain functions (i.e., plan, source, make, deliver, and customer service teams), business units, and other cross-functional partners for developing solutions to drive business value. This team also drives step-change innovation and improvements in business practices by delivering actionable insights through advanced analytics and supply chain expertise.

Place of posting

Mumbai

Bond applicable

No
