Job Details

As an SDE I, you'll be a key contributor in designing and developing high-quality, scalable software systems. You will collaborate closely with product, design, and engineering teams to build end-to-end solutions that impact thousands of users. This is an opportunity to work with cutting-edge technologies and grow rapidly in a high-performance environment.

Key Responsibilities

- Design, develop, test, and deploy scalable and reliable software systems.
- Write clean, efficient, and maintainable code using modern programming practices.
- Participate in architecture discussions and contribute to product design.
- Collaborate with cross-functional teams to deliver high-quality features on time.
- Debug and resolve issues, optimizing performance and scalability.
- Stay updated with emerging tools and technologies to continuously improve the codebase.
