Job Details

Who we are:

Orbit Markets is the leading institutional liquidity provider of digital asset options and structured derivatives. The company was founded in 2022 by former executives in finance and technology, and is backed by major traditional and digital asset investors, including Matrixport, Brevan Howard Digital, and venture capital firms New Form Capital and Maven 11.

In 3 years, we have built a fast-growing and highly profitable business encompassing high-frequency option market-making and over-the-counter derivatives solutions. We are a diverse organisation which seeks to attract outstanding talent from all backgrounds. We strive for excellence in everything we do.

We are now expanding the team with a small number of graduate hires in quant trading and quant development roles. This is a unique opportunity to join a thriving international startup operating at the cutting edge of derivatives trading.

... What you'll do:

- Design, oversee and improve market-making algorithm
- High-frequency data analysis and research
- Pricing and risk management for a portfolio of options and exotic products

The company is flexible with remote arrangements depending on individual preferences. A work visa can also be arranged in Singapore.

Who we're looking for:

- Top-tier academic background in a quantitative discipline
- Very strong quantitative skills: calculus, linear algebra and probabilities are a pre-requisite, additional background in any of stochastic calculus, PDEs or theoretical computer science is a plus.
- Comfortable coding - Python will be required on a daily basis. Prior experience in machine learning will be appreciated.
- Curious, keen to learn, hardworking, adaptable and reliable.

(Prior interest in financial markets is NOT required)
